

THE SCHOOLS@PEACE GLOBAL ANTI-BULLYING INITIATIVE

WORLD@PEACE

The creators of World Peace School Sports Day and Kune have joined forces as **Dynamic Mission** in order to launch the **World@Peace** initiative.

CONCEPT

Peace and stability matters to every single person on this planet, whether that be being @peace globally, in our communities or in our homes. We want to give everyone the opportunity through words and actions to work together to strive for that peace.

Through World@Peace mini programmes and global peace relays (which follow all relevant safeguarding protocols), young people in particular have the opportunity to learn, express and lead initiatives in their community and wider world.

THE PROGRAMME

World@Peace are delighted to partner with the Foundation for Sport, Development & Peace (Franschhoek, South Africa) and with National Pierre de Coubertin committees across the globe in a global schools@peace anti-bullying programme.

Launched at the "International Day of Sport for Development and Peace at 10 - Looking Back and Looking Forward" event on 05 April 2023, the schools@peace programme provides schools and educational authorities with resources based on acts of sporting kindness, Olympic and Paralympic values and builds on successful programmes run by our Co-Founder Derek People such as walls of kindness in schools.

The initiative will be a theme running through 2023 in schools globally and will be featured at the UN World Peace Day Cape Town Conference in September '23.
